12V LUNAR BAKPAK

Lights up to 250m²

Weighs only 8kg

The lightweight 12V Lunar BakPak is designed for mobile work teams, maintenance workers, roadworks, search and rescue operations, railways and police work including, forensics. Wherever mobility is crucial, the Lunar BakPak is your best solution, bringing approx. 250m² of glare free illumination to exactly where it is needed on demand.

The Lunar Bakpak walks with you and is hands free, lightweight and comfortable to carry. Call outs for repairs at night, especially for infrastructure maintenance, demand reliable portable lighting for improved safety and faster job completion. With the Lunar BakPak, no time is wasted on setting up multiple towers, moving light sources or towing lighting equipment to the job site.

Features

- Lightweight, easy to carry, weighs only 8kg. No towing, transports in a car. The light head, battery and accessories are stored inside the back pack unit which contains an impact resistant road case
- Glare free coverage of 250m²
- 360° and 180° capability – the glare free Lunar BakPak can be easily changed from a 360° to a 180° downwards light beam to avoid interference with nearby areas
- Designed to operate in all weather conditions
- 8000°K color temperature – matches the color tones of daylight
- HID globe - rated for 5000 hours
- Solar charging mats available
- Rechargeable, compact lithium-ion battery weighing 1kg; recharges from a car cigarette lighter or main power – accessories included
- One battery charge lasts 4 hours, spare batteries available

GLARE FREE

MANY APPLICATIONS

The 12V Lunar BakPak is lightweight, worn over the shoulders, hands free and battery powered, providing 250m² of glare free light.

Rescue and recovery teams can provide immediate assistance to injured personnel, and provide cable-free lighting, even in small areas and where power is not available.

Maintenance teams can work across large areas without the need to tow and deploy cumbersome lighting towers.

Police can conduct forensic searches more precisely, faster and with greater efficiency across a wider area, finding and recovering more evidence. Manual torches keep one hand occupied, light limited areas, and can dazzle other searchers. The Lunar BakPak provides a crisp white light which replicates the characteristics of sunlight with glare free and hands free illumination.

On rail sites, within tunnels, enclosed areas, warehouses, factories, engine rooms and plants when the power supply is shut down, a Lunar Bakpak will provide 250m² of high quality light. Requires only a few minutes to unpack and power up.
